

Food & Drink

We all love to sit down and relax with a large glass of wine, however we don't all have the chateau and cellar to match, however we have found the perfect solution. The spiral Cellar was originally a French invention, developed by Monsieur George Harnois in 1978 and Spiral Cellars are dedicated to the supply, delivery and installation of the prefabricated concrete wine cellars.

The spiral cellar is accessed through a trap door and built within a week, even if you don't have a basement. Prices start from £13,000 for a mini cellar holding 770 bottles. No longer is it an impossible dream for many dedicated wine-lovers to have a private wine cellar where they can leisurely survey their collection and pick the perfect bottle of Puligny Montrachet for dinner that evening.
